

Jacksons Procurement Policy

At Jacksons we aim to procure all goods in a responsible and sustainable manner.

We will always consider social, economic, health, safety, environment, food safety and quality issues at every stage of our supply chain. We work with suppliers, customers, external agencies and internal stakeholders to implement positive improvements.

Our procurement team embrace change and continuous improvement and strive to deliver the best for the bakery and its customers. Our values are at the core of our decision making and we measure ourselves against these values on an ongoing basis.

We require all suppliers to comply to all applicable laws and regulations and we will give preference to suppliers whom go above and beyond compliance.

We work in a collaborative way with all suppliers to create a sustainable, proactive and honest approach. We hold our suppliers in high regard, and where possible, look to create long term lasting relationships built on trust, humility and respect.

When selecting suppliers and products, we always consider the lifecycle of all goods procured and ensure that environmental and human rights considerations are made throughout the supply chain.

We challenge our suppliers to deliver the best to Jacksons to ensure the best quality, service and value to our customers. We monitor suppliers on performance and challenge bad practice and recognize good.

This policy is reviewed annually and updated to reflect changes and progress made.

Signed on behalf of the Board of Directors

Owen Elliott

Supply Chain Director
